TABLE OF CONTENTS FOR "PHYTOPATHOGENIC VIRUS"

V. L. Ryzhkov
Inst of Microbiol

This 226 page book follows the author's earlier work Osnovy Ucheniya o Virusnykh Boleznyakh Rasteniy (Fundamental Studies on Plant Virus Diseases), published in 1944. The present book is a more specialized treatment of the field of phytopathogenic virus.

The author states that generally studies on plant virus diseases have been conducted along two lines: (1) description of all the new forms of disease, and (2) establishment of a relationship between various diseases and viruses. The first is the more frequent method for dealing with the field, while the latter is characterized by very badly organized, frequently erroneous data. This book lists the more important virus diseases according to some of their patho-morphologic characteristics.

The book is replete with tables, figures, and photographs. Most of the bibliography is foreign.

TABLE OF CONTENTS

		Page
Foreword		3
Chapter I.	Virus Diseases of Urticinae	
	Diseases of the Elm	7
	Mosaic Diseases of Figs	7
	Mosaic Diseases of Mulberry	8
